

INDUSTRY FORUM

The main role of the Industry Forum in the Enabling Grids for E-Science (EGEE) project is to raise awareness of the project among industry and to encourage businesses to participate in the project.

The Industry Forum team has achieved this by making direct contact with industry; liaising between the project partners and industry in order to ensure businesses get what they need in terms of standards and functionality; and ensuring that the project benefits from the practical experience of businesses.

The members of the EGEE Industry Forum are companies of all sizes who have their core business, or a part of their business, within Europe.

The Industry Forum activities include:

- Publishing a quarterly electronic newsletter highlighting the most recent developments of the EGEE project of interest to industry partners (see <http://public.eu-egee.org/industry/newsletters.html>)
- Organising a meeting twice-a-year for Industry Forum members;
- Organising and managing two working groups on industry-related issues, namely business (contact Michel Bénard) and technology (contact Yann Guerin) respectively;
- Fostering contact between EGEE developers and EGEE Industry Forum members.

Team Contacts

The Industry Forum is managed by a Steering Committee consisting of EGEE project partners and representatives from business.

Members of the Industry Forum Steering Committee include:

Michel Bénard, HP, email: michel.benard@hp.com

Philippe Bricard, IBM, email: bricard@fr.ibm.com

Sven Lung, Gridxpert, email: sven.lung@gridxpert.com

Federico Rossi, DATAMAT, email: federico.rossi@datamat.i

Christian Saguez, Ecole Centrale Paris, email: christian.saguez@ecp.fr

Nikhil Shrikhande, Microsoft, email: nikhils@microsoft.com

Beppe Ugolotti, Nice, email: beppe@nice-italy.com

Wojtek Wislicki, University of Warsaw, email: Wojtek.Wislicki@fuw.edu.pl

Guy Wormser, CNRS, email: wormser@lal.in2p3.fr

Anyone interested in joining the EGEE Industry Forum, should contact either Christian Saguez or Guy Wormser.
